

*Electrophysiological Research of the Dynamics of Ki Energy Using the AMI  
Device: Effect of Alteration and Interaction of Ki Energy Between the Practitioners  
during Aikido's Kokyu-ho*

By Koji Tsuchiya

2006

Abstract

The purpose of this result is to investigate how the ki energy works in and around our body when practicing an Aikido technique, with two practitioners working together. This study demonstrated that ki energy in the body was activated and balanced by the Aikido technique, and that ki energy resonated between the partners, which suggests the “*Aiki*” phenomenon.
