# HOLISTIC APPROACHES TO HUMAN EXISTENCE

## School of Integral Noetic Sciences

Advance your understanding of mind, body, and spirit through the research-informed study of consciousness, contemplative and esoteric traditions, anomalous realities, wisdom design, and subtle energy anatomy.

# FOLLOW YOUR PATH FIND YOUR FUTURE

*CIHS is the best graduate school for me. I love the emphasis on both scientific rigor and spirituality, as well as the integration of personal growth in each class. The professors are amazing and the administration is committed to the success and growth of each student. As a retired police lieutenant, I was worried that I might not fit in at CIHS. That couldn't be farther from the truth. CIHS is an integral school that encourages multiple perspectives. If you want to grow not just academically but personally and spiritually, as well, come check out CIHS.*

## California Institute for Human Science

Located near the coast in the beautiful, beach-city of Encinitas in San Diego, California, CIHS is a private, non-profit, regionally accredited university, research center, and public learning community committed to exploring the interconnection of mind, body and spirit through research-informed programs in integral health, integral noetic sciences, and psychology.

# TRANSFORMATIVE EDUCATION TRANSCENDENT EXPERIENCE

CIHS's School of Integral Noetic Sciences is a research-based program committed to exploring the noetic sciences through the historical study of consciousness, philosophy of mind, contemplative and esoteric traditions, anomalous realities, wisdom design, and subtle energy anatomy.

For the **Integral Noetic Sciences M.A.**, study includes an in-depth examination of our current historical moment and how noetic science can contribute to a better world and provides expert guidance and instruction in contemplative practices and philosophical inquiry.

While the M.A. program is designed as a stand-alone degree, it also provides invaluable preparation for CIHS's **Ph.D. in Integral Noetic Sciences** which is built around advanced coursework in the philosophy of science, consciousness studies, and contemplative traditions. Students receive training in spiritual, esoteric, and contemplative practices, gain expertise in relevant mixed methods research, and can expand their overall understanding of the discipline by taking elective courses from CIHS's other programs.
