HOLISTIC APPROACHES TO HUMAN CONSCIOUSNESS

School of Psychology

Prepare for California state Psychology licensure while building a holistic understanding of human consciousness.
CIHS has provided me with opportunities to understand psychology in a grounded scientific way, simultaneously exploring the possibilities and potential realities of life, healing, and consciousness that science has yet to explain. It is an equally supportive environment for healing practitioners seeking to deepen and hone their skills, add to their credentials, or develop proficiency in articulating their work through academic or research endeavors. It is a place where a multitude of perspectives are accepted and integrated into the learning, from wisdom traditions, to clinical understandings, to transpersonal awareness and beyond.

- Michael Scott, Psychology Ph.D. student

California Institute for Human Science

Located near the coast in the beautiful, beach-city of Encinitas in San Diego, California, CIHS is a private, non-profit, regionally accredited university, research center, and public learning community committed to exploring the interconnection of mind, body and spirit through research-informed programs in integral health, integral noetic sciences, and psychology.
TRANSFORMATIVE EDUCATION TRANSCENDENT EXPERIENCE

CIHS's one-of-a-kind school of psychology allows graduate students to build a holistic and integrative understanding of consciousness while exploring its relationship to the domains of mind, body, and spirit.

The M.A. Psychology prepares students for practitioner roles or for doctoral study through a unique interdisciplinary program that emphasizes general psychology, integral psychology, integral noetic sciences, and/or life physics.

- After completing a program's required courses, all CIHS students have the freedom to build custom specializations called “Individually Designed Concentrations” (or IDCs) using their elective units and courses from any of CIHS's unique programs.

The Ph.D. Psychology prepares students for California state licensure while completing advanced studies in consciousness, spirituality, and holistic treatment methods. Students can choose one of the following concentrations:

- Psychology licensure concentration (for the state of California)
- Integral Psychology concentration
- IDC concentration

In both programs, advanced coursework addresses core issues in clinical psychology as a treatment and research area while allowing for elective study in the related areas of mind, body, and spirit.
